PJ SERVICES SUMMARY INFORMATION

The following provides summary information of PJ Services and our associate companies in South East Asia with a brief company profile. We have a significant footprint in the Asia-Pacific region and are continually looking to expand into new markets either via dedicated PJ offices or via alliances or joint-ventures.

AREA / OPERATIONS

PJ Services is a leading regional company in the provision of Products and Services for the Oil and Gas Production and Petrochemical Industries. We supply equipment throughout the Asia-Pacific region including: Australia, Brunei, China, India, Indonesia, Malaysia, Myanmar, the Philippines, Thailand and Vietnam. Traditionally we have supported offshore production platforms, vessels and pipelines although as our business has matured we have increased our coverage to include onshore pipelines and production operations. We have strong associations with all of the regional fabricators and quote equipment for every new platform or vessel in South-East Asia either to fabricators, direct to oil companies or Consultant Engineers.

Our sales of equipment during the last 25 years now generate considerable parts business and service work, so that we are regular customers of the maintenance and procurement departments of the regional oil and gas operators.

We have a dedicated engineering department which give technical support to the sales and product managers for the products that we represent. Our engineering group also design and manage the fabrication, testing and installation of such equipment as Chemical Injection packages; Pump Packages and Pig launchers and receivers.

One of PJ's primary objectives is to be involved in projects as close to their inception as possible. To facilitate this we visit the consulting engineers during the design stage of new projects to provide technical information, assist in identifying alternative solutions and to promote our products.

In addition we have product trained service engineers for installation, testing and commissioning of products. Our engineers are also available for service work and any training required by our customers.

PJ Services also do a large volume of general sourcing and procurement through a substantial supplier network, which has been built up over the 25 years that we have been in business.

PJ have always had a commitment to quality of service and products and to this end have incorporated ISO 9001 (2000) quality standards into our work processes.

A list of our products is shown on the following page.

PRODUCTS

Our range of products and equipment are covered in 5 main categories:

Pipeline Products

- Pipeline pigs (foam and mandrel), spheres, pig signallers, closures, pipe testers
- Pipeline repair fittings
- Pipeline Clamping / Saddle systems
- Comprehensive Buoyancy and thermal insulation systems
- Stainless steel pipes, tubing and fittings

Offshore Mooring Systems and Sub-Sea Equipment

- SBM Mooring Hawsers
- Chains, Shackles and Fittings
- Full range of buoyancy equipment.
- Subsea Arch Systems
- Thermal Insulation
- Cable and Flowline Protection
- VIV Suppression Systems

Production / Process Equipment

- Reciprocating Pump Packages
- Pump Pulsation Dampeners
- Helicopter Refuelling Systems
- Reverse Osmosis Desalination Plants
- UV Sterilizers

Material Handling Equipment

- Crane Wire Ropes
- Slings, Fibre Ropes, Webbing Slings
- Crane Replacement / Spare parts

Platform Jacket Equipment

- Jacket Leg Diaphragms
- Grout Seals
- Pile Grippers
- Internal Lifting Tools
- Marine Fenders
- Shock Cells / Barge Bumpers / Rub-Strips
- Eccentric Bumper Rings

Fire and Blast Protective Products and Solutions

- Blast & Fire Walls
- Blast resistant and/or Fire Rated Doors
- Water Tight and Gas Tight Doors
- Total Concept – Walls, Doors, Windows, Floors, Interfacing Work, Engineering & Design
- Refurbishment, Maintenance & Repair, Spare Parts, Quality Inspections
